

# Locumsmart: The most robust VMS solution for locum tenens management

What makes Locumsmart stand out? Quite simply, it's the most robust, out-of-the-box solution for locum management— and it's 100% free to use. There are no hidden fees, no monthly charges, and no implementation costs. Here's everything you get when you sign up.

## Access to web-based software

Locumsmart will assist with implementation, provide training to employees, and help set up integrations with existing systems — all at no cost to you. The platform is regularly updated, with product enhancements added almost weekly and accessible immediately.

## Scheduling tools and solutions

Create a float pool management group to streamline scheduling, forecast coverage needs, project costs, and evaluate trends over time. Locumsmart customers are also assigned a dedicated scheduling analyst, who helps organizations manage their complex schedule needs.

## Invoicing and bill pay

Receive access to online bill pay and an 12-point compliance check on every invoice before it's approved. Additionally, consolidated billing allows healthcare organizations to customize and simplify their billing processes.

## Provider procurement tools

Quickly compare, select, and confirm candidates. The platform also provides instant, automated, provider ownership protection, allowing you to see when a candidate was presented by a specific agency. Finally, an agency dispute resolution process resolves issues quickly.

## Actionable Data

Gain insight into your locum utilization, cost, and forecasting. This includes on-demand analytics with real-time data in a self-serve format, and includes insight sharing, KPI tracking, and forecasting for utilization and cost. Locumsmart can also give you visibility into average rates by specialty and region.

## Assistance and troubleshooting

Each healthcare organization is assigned a dedicated account manager and has access to 24/7 chat support, tech support, and free learning and training modules.
